INTERFIT – SECULINE AGREE DISTRIBUTION RIGHT

Interfit, one of the leading manufacturers of photographic lighting is pleased to announce it will be the exclusive distributor for the Seculine Corporation of Korea in the USA from Dec 1st 2008

We are delighted to be associated with the Seculine range of award winning products which has grown with the advent of digital photography. The Seculine range consists of easy to use Infra-red remote triggers, Color Management tools for all types of stills and video photographers, a hotshoe mounted 'Action Level' and the Zigview LCD monitors enabling remote viewing of the camera viewfinder.

The Action Level

This is an ideal tool for any photographer wishing to get there images level, via the clip on 'Action Level' to the hotshoe. A unique LED light system lets you know if the camera is level, so when you see a green light you are ready to go even if shooting in a vertical format.

Prodisk

Prodisk is an easy to use one stop solution for color correction management and the setting the exposure at the image taking stage. The Prodisk is packed in an easy to clean plastic wallet that will fit into every camera bag. Using the Prodisk will help to solve those difficult lighting situations by correcting the exposure and setting the correct white balance on a DSLR or Video camera.

Remote Triggers

The Remote Triggers are an essential tool for landscape and wildlife photographers allowing the camera to be positioned away from the user. By removing the traditional ties of a cable remote you can place the camera in inaccessible locations to get that once in a life time shot.

Zigview

Zigview is the ideal answer to seeing though the viewfinder without the need to be directly behind the camera.

Further information will be available on the Interfit Website shortly.
