STROBIES – TITAN PRO TRANCEIVERS AND SHUTTER RELEASE CABLES

Interfit, one of the leading manufacturers of photographic lighting is pleased to announce the arrival of the Titan Pro Transceiver's. The Titan Pro is able to trigger camera shutters wirelessly on a wide range of Nikon, Canon, Fuji and Sony Cameras, ideal for Sports, Studio & Wildlife photographers up to a distance of 100 mtrs (320 feet). In addition to triggering shutters, the Titan Pro triggers a wide range of studio lighting including Interfit strobes via the included PC Sync cable. A built in hotshoe enables camera manufactures flashguns to be remotely fired in manual mode. A 1/8 female adaptor allows the Titan Pro to be mounted on a light stand, monopod or a tripod.

User examples for the Titan Pro transceivers are endless, a unit could be mounted on camera at the side of a football pitch and a remote Titan Pro unit and camera placed behind the goal or inaccessible locations to capture all the action. Other possibilities include concerts, triggered from anywhere inside the venue or for triggering remote flashguns in wildlife situations. Titan Pro is compatible with other professional products working on 433Mhz.

Titan Pro is sold in single units, enabling the purchase of additional units to suit your requirements. To fire a remote camera or flash you will need additional Titan Pro units at £89.99 inc vat each.

Titan Pro requires optional cables for shutter release on each camera in use, available shortly in the following fittings at £24.99 inc vat each.

STR160	Nikon D70s/D80 Digital Camera
STR161	Nikon N90s/F5/F6/F100/F90/F90X D1/D1H/D1X/D2H/D2Hs/ D2X/D2Xs/D3/D3x/D3s/D200/D300/D300s/D700 Kodak DSC-14N/Fuji S3 Pro/Fuji S5 Pro
