

INTERfit

Background Support Stand

Assemble the cross pole:

The cross pole is supplied in 3 pieces. Either two or three sections can be used together dependant of the background width. Each tube section has a split connection rod on one end which can be inserted into the open end of another tube. When connecting only two sections of tube, make sure that the two tubes are the ones with oval slots in one end.

Spigots

Fix the two brass spigots (wrapped with the cross pole) onto the treads located at the top of each stand (the black thread protector will need to be removed)

Fixing the Cross Pole in place

The cross pole is fixed in place on the stand spigots as shown in the picture.
